d/ daycell.md

Commit your day.

A journal that looks like a code notebook and saves everything to one plain `.md` file you own. No account. No subscription.

```
[1]:  07:15 · okay · #morning
      morning pages
      One thing that would make today a win: one hour of deep work.

[2]:  21:42 · great · #wins
      shipped the thing
      commit message for today: feat: finally trusted myself

[~]:  daycell.today()
      streak: 30 days. keep the loop running.
```

£0
to write, forever. Prompts, streaks, search, export.

£12 once
for Pro. No renewal, no account.

1 file
Plain markdown. Opens in any editor, works with Obsidian.
